
Program-Specific Outcome: Bachelor of Arts in Geography

Upon completion of the Bachelor of Arts in Geography program, students will exhibit a well-rounded and integrative set of skills and knowledge, fostering the development of critical thinking, effective communication, constructive social interaction, effective citizenship, ethics, environment and sustainability awareness, and a commitment to self-directed and lifelong learning. The program outcomes are tailored to the diverse areas of geography covered in the curriculum:

- ✦ **INTEGRATED GEOGRAPHICAL COMPETENCE:** Demonstrate a comprehensive understanding of Physical Geography, Human Geography, Soil Geography, Resource Geography, Oceanography, Agriculture Geography, and other specialized fields, integrating knowledge across these disciplines to analyze complex geographical phenomena.
- ✦ **CRITICAL THINKING AND PROBLEM-SOLVING:** Apply critical thinking skills to evaluate and analyze geographical theories, data, and methodologies across different geography papers, fostering the ability to address and solve complex geographical challenges.
- ✦ **EFFECTIVE COMMUNICATION:** Communicate geographical concepts and findings effectively through written reports, oral presentations, and visual representations, utilizing advanced tools and techniques in geography to enhance communication.
- ✦ **CONSTRUCTIVE SOCIAL INTERACTION:** Engage in constructive social interactions within the academic and professional context, collaborating with peers to address geographical issues, and demonstrating effective teamwork and interpersonal skills.
- ✦ **EFFECTIVE CITIZENSHIP AND ETHICAL CONDUCT:** Demonstrate a sense of effective citizenship by applying geographical knowledge to contribute positively to local and global communities.
- ✦ **ENVIRONMENT AND SUSTAINABILITY AWARENESS:** Advocate for environmental sustainability, applying geographical principles to understand and address environmental challenges and contribute to sustainable resource management practices.
- ✦ **SELF-DIRECTED AND LIFELONG LEARNING:** Cultivate a commitment to self-directed learning, continuously seeking opportunities for professional development, and staying informed about advancements in geographical thought, tools, and techniques.

This program-specific outcome aims to prepare graduates who not only possess specialized knowledge in geography but also embody a broad range of skills and values essential for personal and professional success in the field.
